To

V.R.Thyagaraja Iyer, Esq., M.A.,
Secretary to the Government of His
Highness the Maharaja of Mysore,
REVENUE DEPARTMENT, B a n g a l o r e.

Sir,

In accordance with para 6 of Government Order No.1143-7 M1.131-13-53 dated the 9th August 1915 directing the continuance of the appointment of whole-time President of the City Municipal Council and Chairman, City Improvement Trust Board, Mysore, I have the honour to enclose herein a report on the result of the working of the above arrangement both as regards the City Municipality and the City Improvement Trust Board, during the period of two years commencing from March 1914 and ending with February 191

2. Copies of the resolutions of the Municipal Council and the Trust Board adopting the above report in their meetings dated respectively the 22nd and 24th of April 1916, are also enclosed.

I have the honour to be,
Sir,
Your most obedient servant,

T.G.Lukshmana Rao

Encl to Govt 2148-15-1

Report on the working of the City Municipal Council and the City Improve-ment Trust Board, Mysore, during the period of continuance of the appointment of Mr.T.G.Lukshmana Rao as whole-time President of the Municipal Council and Chairman of the Board of Trustees for the two years commencing from March 1914 and ending with February 1916.

INTRODUCTION.

The tentative arrangement ordered in Government Proceedings No.7035-8/Ml.295-12-1 dated the 4th March 1913, under which Mr.T.G.Lukshmana Rao was appointed whole-time officer to devote his undivided attention to these departments, has been in force for the last 3 years. A report on the result of the working of the above arrangement during the first year of its initiation, in which the President-Chairman could hardly get more than 7 months time for solely attending to the Municipal and Trust Board works proper, was submitted to Government in April 1914. The present report is a review of the work of the subsequent 2 years, wherein, however, certain results of the first year are also touched upon, whereever necessary, for the purpose of comprehensiv-ness. This report is divided into 2 sections, one showing the work of the Municipality and the other of the Trust Board.-

SECTION I.

Mysore City Municipality.

Municipal Revenue.

2. Regarding the administration of the Municipality, there has been in the first place, a perceptible improvement in its Revenue. Statement No.1. appended to the report shows that the Municipal Revenue for the two years from March 1914 to February 1916 amounted to Rs.2,73,249/- for each year of the period under review, against the Revenue of Rs.2,35,755/- for the first year of the above tentative arrangement, and Rs.1,93,262/- the average revenue for each of the three preceeding years.

3. The increase under revenue during the period under review is particularly appreciable under "Municipal Rates and Taxes", which is an evident result of sustained efforts having been put forth and greater care bestowed for improving the realisations from assessed taxes and Octroi duties. The work of revising the assessed taxes which had not been effected since 1905 though the -- Municipal Regulation contemplates such revision once in four years, was taken up and completed with great care and attention during the period under report. This revision which tended to enhanced assessment, was brought into effect from 1st July 1915. As regards the Octroi Revenue, the detection of irregularities

during the time of the previous Octroi Daroga against whom Criminal proceedings have been instituted under the orders of Government, the changes made in the personnel of the Octroi Department. and above all, the means provided for closer scrutiny and more efficient check over the work of the collection staff, have contributed towards enhancing its revenue during the period under report, the income for the two years from March 1914 to February 1916 amounting to Rs.1,69,788/- against Rs.1,52,035/- the income for the previous corresponding period, or an excess of nearly 12 per cent. The actual increase in the 12 months after the suspension of the previous Daroga is Rs.29,382/- over the realisations of the similar period prior to it.

4. The other items that have contributed towards the increase of revenue during the period of 2 years under review are -

i. Tolls:- The income under this head which was only Rs.24,394/- during 1913-14 rose to Rs.25,800/- in 1914-15 and to Rs.32,268/- in the year 1915-16.

ii. Rents from Markets and slaughter HOUSES :- Owing to improvements effected to the Devaraj Market and the arrangement made for the prompt collection of rents, the income under this head increased from Rs. 9520/- in 1913-14 to

to Rs. 9844/- & Rs.1457/- in the years 1914-15 and 1915-16 respectively.

iii. Saving of interest by discharge of loan and investment of surplus funds:- The balance of Rs.14,400/- outstanding against the Municipality out of the loan of Rs.24,016/- taken from Government was discharged during the period under review, and thus a sum of Rs.576/- which was payable as interest was saved. Out of the balance at the credit of the Municipality, a sum of Rs.25,000/- was invested in the Mysore Bank as fixed deposit, which brings in an interest of Rs.1,025/- at 4½ % per annum.

5. Apart from the several measures adopted for improving the efficiency of the collection Department of the Municipality, detailed enquiries were instituted during the period under review, into the various cases of arrears which were outstanding, for many years, and after careful scrutiny, such of the arrears as were found irrecoverable were written off. This has placed the collection work of the Department on a better basis by relieving the staff employed of their dejection from unfruitful endeavours to

to collect irrecoverable arrears, and creating in them a sense of emulation for showing substantial and satisfactory progress, more in the hopeful direction.

Expenditure.

6. On the side of expenditure too, there has been, as shown in appended statement No.II. a marked increase during the two years under review, consequent on liberal outlay on account of Public Works, Public Instruction and Public Health, and convenience and safety. The average annual expenditure during this period amounted to Rs.2,57,000/- against Rs.2,33,311 the expenditure incurred during the first year of the tentative arrangement, and Rs.1,71,952/- the average expenditure for the three years immediately preceeding it.

PUBLIC WORKS.

7. During the period under report works both original and repairs estimated to cost Rs.1,60,242/- were undertaken, and of this Rs.1,19,385/- were spent up to end of February 1916.

8. The most important original works undertaken and executed during the period under report are given in statement No.III. The following works are in different stages of progress.

(1) Construction of a chattram for poor travellers in lieu of the Clark's chattram made over to the Military Department (estimated cost

cost Rs.4,000/-). This will be completed by June 1916.

(2) Formation of new burial and cremation grounds (estimated cost Rs.2,642/-).

(3) Construction of a blockmof house for sweepers near Jalapuri (estimated cost Rs.1,588/-.)

9. The survey of the Chamundi Hill under Government Order No.G.6737/85/C.M. 261-14-1 dated the 29th December 1914, has been completed. Estimates for improvement works for the Hill are under preparation. A line of levels required by the Chief Engineer for projecting the special Tramway was taken and submitted.

10. The recoating of all the important roads and the effecting of repairs to a large number of minor lanes left unattended to from many years, was a remarkable feature of public works carried out during the period under report.

11. With the co-operation of the Trust Board the planting of Avenue trees on all the important roads in the City was also undertaken availing of the sanctioned grant of Rs.5,000/- for the year 1915-16. A comprehensive programme with estimates amounting to Rs.42,000/- was prepared and submitted to Government.

PUBLIC INSTRUCTION.

12. The expenditure on this head has also been considerably increased The Inspector-General of Education having handed over the working of the scheme relating to the compulsory education in the City, to the Municipal Council, no pains were spared to bring the scheme into a working order. Two new schools were opened during the period under review A building was newly erected for a Girls' school in Chamaraja Mohalla. Many a patriotic and public-spirited gentleman have already come forward to aid in the cause of education of the children of their city either by granting their buildings, or spending liberally on construction of new buildings for school purposes.

PUBLIC HEALTH, CONVENIENCE AND SAFETY.

13. Various measures having for their object the improvement of public health, convenience, and safety, were undertaken during the period under report. The following are some of them:-

i. Anti-Malarial and lake fly preventive measures:- During the period under report, the malarial survey of the city was conducted by means of a special staff engaged for the purpose. As many as 351 disused wells and other breeding places of Mosquitos were closed. Leaflets containing useful

useful hints for taking precautionary --- measures against malaria were also freely distributed. Complaints about the --- nuisance caused by lake flies near Doddaker tank bund road, have been engaged for the last 3 months for dredging and for removal of rank vegetation from the sides of the tank where they are said to thrive.

2. Stray Cattle:- The increase of stray cattle in the City has been a source of much nuisance to the public and especially to motorists using the public roads, besides being a source of damage to private gardens etc., To abate this nuisance, special arrangements were made by providing for rewards to impounders and by employing special impounders. As a result of these measures the number of cattle impounded in the pounds has increased with corresponding increase of income under this head. It is hoped that this nuisance will altogether disappear in course of time.

3. Public Water Fountains:- As several localities in the City had not been provided with public fountains and

indexed and registered.

Meetings of the Municipal Council and Committees.

15. The Municipal Council met 42 times during the period under report and all these meetings were presided over by the wholetime President. The general election of the Municipal Councillors was held in August 1915. The regular meetings of the several Committees formed in April 1915 for Municipal and other activities, on lines laid down in Government Order No.4144/M1.99-14-2, dated the 23rd November 1914, are being held every month.

Rules and Bye-Laws.

16. The following rules and Bye-laws framed during the period under report received the sanction of Government:-

i. Rules under section 4 of the Public Conveyances Regulation

ii. Rules for regulating the speed of Motor Vehicles in the City.

iii. Bye-laws regulating the working of Slaughter Houses.

iv. Bye-laws for awarding rewards to informants in cases of smuggled goods.

v. Bye-laws under section 46 and 48 of the Municipal Regulation

vi. Bye-laws relating to Dangerous and Offensive trades, and

~~vii. Bye-laws Conducting~~

vii. Bye-laws regulating building and other structures.

Owing to the enforcement of the provisions of the several bye-laws, the number of prosecutions rose from 39 in the year 1912-13 to 97 in 1913-14, and 108 in 1914-15 and 216 in 1915-16, the per centage of convictions being 56 % on the average.

17. During the period under report almost all the bye-laws were translated into Kannada. Printed copies thereof are now available for sale.

Hand book of Mysore.

18. A hand-book for the city was compiled. Printed copies of the same are ready for the use of visitors and others. The book is highly appreci-ated both for its neat get-up and useful-ness.

Local Board and Municipal Conference.

19. The most important feature during the period under report was the holding of the Local Board and Municipal Conference, under the auspices of the Municipal Council in the Mysore City in June last. A large number of subjects were discussed and resolutions passed, at this conference. The following were some of the most important subjects dealt with:-

b. Amendments to the

1. Amendments to the Municipal Regulation.
2. Levy of profession tax.
3. Abolition of Octroi.
4. Grant of Excise revenue within Municipal limits to the respective Municipality.
5. Town-planning bill.
6. Erection of Sanitary houses.

Co-operation of Municipal Councillors and Rate Payers with the Municipal Executive.

20. Ever since the present President-Chairman assumed office he has kept steadily in view the prime importance of securing intelligent and efficient co-operation of the Rate-Payers in general and the Municipal Councillors in particular, in matters pertaining to Municipal administration. A programme of inspection for a whole month is made at the beginning of the month. On fixed days, every week according to the programme the Municipal Executive accompanied by the Municipal Councillors to inspect the several Mohallas in succession, meet the rate-payers, find out their wants and take steps to remedy the defects noticed and improve the existing state of things. In this manner, interest on the part of the public in Municipal affairs is aroused and maintained.

Horticultural Show.

21. In addition to the usual special works connected with the Birthday and Desara Festivities the President had to attend, as the Secretary of the Horticultural Show Committee in Mysore, to the opening and management of the Flower Shows held in August 1914 and August 1915. On account of the success attained in both these shows the holding of the show twice in a year instead of once was ordered, and accordingly a show was held in February 1916, which as observed by the Judges was a decided improvement over those of the previous years.

SECTION II.

City Improvement Trust Board, Mysore

Object of formation of the Trust Board.

22. Before giving an account of the administration of the Trust Board during the 2 years under review, it has to be mentioned by way of preface that this Institution was one expressly created for the specific purpose of improving and expanding the various parts of the Mysore City on the comprehensive lines prescribed by Government from time to time. As such, the characterstic feature of its activities is more monotonous than

from March 1908 to February 1913, during which the -- Deputy Commissioner of the Mysore District had been -- appointed as the Chairman Ex-Officio of the Board, the Executive Engineer and one of the Assistant Engineers con- ~~tinuing~~ tinuing.

3. The present period commencing from March 1913 has had three years' duration at end of -- February 1916. A whole-time officer to be both Chairman- of the Board of Trustees and President of the Municipal Council, Mysore, has been appointed during this period as a tentative measu_, with no separate Executive Engineer

Comparision of work done during each period.

23. The duration and the staff of the Board's establishment of each of the above periods being found to var a comparision of the mere bulk of work turned out either during each of the above periods or a portion of equal dur- -tion of each of the above periods serves no purpose, to test the efficiency of the respective arrangement, unless it is instituted with reference to a common unit of establishment. A comparison

An attempt is therefore made hereunder to exhibit the progress of work done severally under designing and executing Improvement Schemes, during each of the above periods and compare the same by a common standard of measurement:-

I. PROGRESS UNDER PREPARATION OF IMPROVEMENT SCHEMES.

Period	Nos and Estimated Cost of Projects prepared								Establishment charges incurred during the period	Means of work with reference to Cost of Establishment (Ratio of Cols 9 & 10)
	Original		Revised or modified				Total			
	Nos	Estimated Amount	Nos	Amount of revised or modified estimates	Involved on estimates prepared either by the Improvement Committee or other original estimates	Net extent of expenditure effected (Difference of Cols 5 & 6)	Nos	Amount (Sum of Cols 3 & 7)		
1	2	3	4	5	6	7	8	9	10	11
From Dec 1903 to Feb 1908	13	2,88,500	13	1,67,437	12,77,531	3,89,906	26	6,78,406	1,79,555	3 78
From March 1908 to Feb 1913	24	17,41,926	6	8,90,494	8,46,219	44,275	30	17,86,201	1,50,075	11 90
From March 1913 to Feb 1916	57	28,95,450	17	13,02,353	11,28,047	1,74,286	74	30,69,937	71,826	42 74

II. PROGRESS UNDER EXECUTION OF IMPROVEMENT SCHEMES.

Period.	Expenditure on acquisition of properties and construction works.	Establishment charges incurred.	Measurement of work with reference to cost of establishment. (ratio of Col 2 and 3).
From December 1903 to February 1908.	13,10,282	1,79,555	7.29
From March 1908 to February 1913.	10,20,948	1,50,075	6.80
From March 1913 to February 1916	9,06,493	71,826	12.62

Expressing the results shown in tables I and II. above by ratios of percentage, the efficiency of work done in respect of preparation of improvement Schemes, amounts to 73% in the period under review against 20% and 6% respectively in the second and the first period. As regards the efficiency in point of execution of the schemes, the results of the current period again represent 47% while those of the first and second periods stand at only 27 and 26 per cent respectively. The above figures speak for themselves.

Nature of Improvements contemplated in each period.

24. During the first period of the Board, the improvements contemplated

related to (i) the formation of new and alteration of existing streets, (ii) the creation of open spaces with the object of removing congestion and facilitating conservancy, (iii) the provision of a proper drainage system in place of ill-graded and inefficient " V " shaped slabbed drains, and (iv) the formation of extensions for locating the population displaced in congested localities. In the second period though the schemes of improvement continued on the same lines there was a change in respect of one essential viz., that the original combined system of surface drains and underground sewers was discontinued in favour of an independent underground sewerage system for the whole city and a scheme for the same was accordingly prepared for the whole city. During the present period the execution of this underground sewer-age project was started and is now in full swing and the scope of improvement schemes also enlarged so as to include therein, works adding to the public conveniences and attractions of the city. At the very commencement of this period, a report was submitted to Government with an exhaustive programme of required improv-ments for the city from sanitary and also aesthetic points of view after a careful study of its conditions and needs.

Improvement Schemes prepared during the two years under review.

25. With reference to this report, the Government prescribed in their Order of November 1914, a supplemental programme of works to be carried by both the Trust Board and the Municipal Council for the expansion of the city and the creation of certain public conveniences and buildings adding to its beauty. Estimates were prepared to the extent of Rs.35,15,793/- for the works that were required to be attended to by the 2 Bodies under the said programme in addition to certain other estimates amounting to Rs.5,42,368/- during the period of the two years under review. The accompanying statement No.IV. shows the estimates prepared for the total sum of Rs.40,58,161/- as above, which number 62. The first forty-five of these estimates costing Rs.29,72,521/- were submitted for sanction during the above period, and three estimates (numbered 46 to 48) costing Rs.35,723/- subsequently. The remaining 14 estimates costing Rs.10.49,917/- which have also been passed by the Board, are under submission.

Execution of works-Acquisition and demolition of properties.

26. During the term of Deputy Commissioner, Chairman, the work connected with the acquisition of properties for the purposes of the Board was being attend to by the Senior Vice-President of the Mysore City, Municipal Council. The

This work subsequently devolved upon the Chairman himself under Government Order No.4345/M1.130-1 dated the 24th March 1913. During the 3 years of the present tentative arrangement 510 properties costing Rs.2,31,746/- were acquired against 310 costing Rs.4,37,337/- (mostly comprising valuable properties in the Fort) in the preceeding three years, the number of properties acquired during the period of two years only under review being 442 which cost Rs.2,16,844/-. In respect of acquisition of these 510 properties, no necessity arose for reference to the Civil Court for settling the amount of compensation, payable except in 4 cases involving Rs 2,147/- In two of these cases the original awards were upheld The two other cases involving Rs.1,241/- are pending.

27. In connection with the acquisition work, there were two important matters which had not sufficiently engaged the attention of the Board in the past. These were fully entered into sebsequently during the period under review and final conclusions arrived at as mentioned below -

i. In respect of certain properties declared for acquisition years ago, it so happended that they were

were not possible to be acquired wholesale in accordance with the original declarations. Some of these properties were likely to be improved by the owners themselves, while in the case of others the necessity of acquiring them did no longer exist. In all such cases, the omission to have a formal notice published withdrawing the original declaration as to their acquisition, proved a great inconvenience and even hardship to their owners. This matter was earnestly taken up during the period under review and with the labour of the -- special committee, of which the Chairman was the President, the inspection of all the unacquired properties out of the declared ones in the several Mohallas of the city was completed; A final Notification of withdrawl in respect of such of them, as the acquisition whereof was found unnecessary is prepared for submission to Government.

ii. Providing suitable accommodation to the population displaced by the operations of the Trust Board had not received the required amount of attention which the gravity of the question demanded. The investigation made into this question during the period under review led to the conclusion that 50% of the displaced population in the previous years added to over-crowding elsewhere in the City. A scheme discussing upon the various causes of this undesirable result and suggesting measures on practical lines, for the re-housing of the displaced poor and the granting of house-building advances on an increased scale was placed before the Board and sent up to Government with their approval. This scheme involved an outlay of 5 lacs of rupees at the rate of 1 lac a year.

Execution of works of construction.

28. The number of works that were

were attended to during the two years under review was 41 of which 26 were those that were newly started and the rest were incomplete works of previous years. Statements Nos. V and VI. appended to the report show the progress made under each of these works up to end of February 1916 against its estimate. These forty one works may broadly be classified as below:-

Class.	Nos.	Expenditure up to end of February 16.
1. Sewerage and drainage works.	12	5,49,395
2. Works adding to the public conveniences or attractions of the City.	18	93,776
3. Works for the expansion of the City.	1	9,429
4. Miscellaneous works.	10	28,947
Total	41	6,81,547

Progress under sewerage and drainage works.

29. Since the commencement of the introduction of the new underground pipe system which was almost synchronous with the appointment of the whole-time President-Chairman, nearly Rs.1,38,680/- running feet or 26½ miles of sewers have been laid in --

unwilling to come forward to take extra connection at their own cost. The best possible solution for getting over the difficulty was found in constructing these connections according to the actual requirements of each house at the cost of the Trust Board, and making the house owners pay a reasonable drainage Cess to the Municipality on account of such connections. Necessary proposals were placed before the Board and Government and the same have been sanctioned. After the Out-fall works were completed, the gardens below Doddakere were perforce deprived of the use of the crude sewage which they had formerly enjoyed. Under this changed condition, relief to the owners of these gardens, especially Holeyars that were growing betel-vine in portions of them became an anxious question. So far as the Trust Board is concerned, it has met the difficult portion of the matter by making it possible to transfer these gardens under a lease system to the new sewage Farm at end of the Out-fall

Out-fall works. The works of the Sewage Farm are in progress. In it, no experimental or demonstrative work will be undertaken unlike other Farms elsewhere, but lands will be leased out mostly for betel cultivation. The Farm to be soon opened out is expected to yeild at once.

Instances having occured of the underground drainage works being interfered with by private persons by boring holes into manholes or otherwise tampering with the Pipe system, with a view to tap sewage water therefrom, fo irrigating their own private -- gardens, a set of draft rules was prepared to provide against such unlawful interferences. - These rules as approved by Government have been published under Notification No.6323/M1.69-14-60 dated the 16th February 1918.

Progress under works of Public conveniences or attractions of the City.

31. It was only since the last 3 years, that the Board has undertaken as elsewhere mentioned, works of -- improvement, in this direction The operations of improvement under this class were confined during the above

above period mostly to that locality of the south-east portion of the City, lying between Nazarabad High Road on the North, Karanji Tank on the east, Race Course Road on the south and Fort Rampart wall on west. The cutting, grading and sectioning of the Karanjee Tank and Doddakere Tank bund roads by removing undulations and irregular gradients, the improvement effected at the junction of 6 roads at the eastern gate of the Curzon Park, by diverting the Doddakere Feeder channel that was intercepting it, and forming a circle called the "Hardinge Circle" at the junction, and laying out this circle with flower beds and providing the same with electric globe lights and seats, the filling up of the Fort Eastern Ditch and the western portion of Doddakere and the adjoining grounds, the defining of the junction of the Chruch Nazerabad and Tank bund roads prominently by means of a triangular island in the middle , the construction of an ornamental parapet wall in front of Zoo - these and other works of improvements have considerably added to the picturesqueness of the locality. Such is the combined effect of these improvements that should an old resident of the city of Mysore, who has not been in it for the last 3 or 4 years, happen to visit this locality he will be taken up at once with the illusion that he is no longer in his old fami

familiar City but is amidst altogether a new charming panorama.

32. Similar improvements have also been started in the other parts of the city by creating foot-paths, by planting avenue trees on important roads, by widening the roads at turns where there was danger to traffic, and ~~improving~~ by levelling up the undulations and tidying up the grounds at entrances of the City, and so forth. With the Special annual grant of Rs.25,000/- generously promised by Government on account of improvements of this description, a study progress on the side of aesthetical improvement of the City on the lines of the comprehensive project already prepared is vouchsafed for the future. Already as many as 9 works are undertaken under this grant.

Progress under expansion works.

33. During the period under review, a new residental area providing for 91 buildings sites each measuring 60 by 40 feet was created by acquiring the Mango Garden that belonged to the late Mr.Bhakshi Basappaji Urs. This forms a part of the big extension known as the "Chamundi Extension" sanctioned recently which provides for more than 600 sites and of which 156 sites have already been sold.

Progress under Miscellaneous works.

34. The chief items of expenditure under this head are (1) the construction of

of model dwellings for the poor and middle classes, and (2) Repairs to old works constructed by the Board.

1. Construction of model houses:-

Out lay on this work up to end of February 1916 was Rs.9,681/-. In consideration of the large influx into the City, of the population of the class of Government servants traders and artisans of moderate means who had no suitable houses of their own to live in, 10 model houses of three different designs varying from Rs.786/- to Rs.2,000/- in cost, were built departmentally in various Mohallas of the City, out of the lump-sum amount of Rs.30,000/- sanctioned in Government Order No.221-5/Ml.51-14-63 dated the 12th July 1915, to experiment upon as to how these houses would be taken to by the public. The results obtained hitherto have been very encouraging. So many as 24 applicants came forward all so soon to buy the 10 houses built, offering various terms as regards payment of their cost. The Board laid down the condition that the intending buyers of these houses should pay half of the amount of the cost in advance, and pay the balance with interest thereon at 3% per annum

annum within 4 years, in monthly instalments. Two houses have already been sold under these conditions and in five cases parties have signified their consent to the same If the scheme on an enlarged scale with cheaper designs introduced into it be undertaken it cannot but be a -- financial success.

2. Repairs to old works:- Outlay on this work from March 1913 up to end of February 1916 was Rs.7,947/-. The question of transfer of the completed works of the Tryst Board for maintenance to the Municipal Council was the subject matter of great controversy of several years past. The measures taken successively by the Board to hand over, and the reasons put forth by the Municipal Council to avoid taking charge of, -- these works, were thoroughly reviewed and placed before Government in a complete form during the period under review.

House building loans.

35. Loans for house building purposes were granted to the extent of Rs.69,630/- from the date of forma-

formation of the Board up to end of -- February 1916, to 542 persons. This number of persons that were benefitted and the average extent to which that benefit extended to the individuals -- during each of the three periods of the Board are as shown below:-

Period	Number of cases of loans.	Amount of loans granted	Average amount.
From 1904-05 to 1907-08	241	11,698	49
From 1908-09 to 1912-13	177	30,895	174
From 1913-14 to 1915-16 (up to end of February 1916)	124	27,037	218
total	542	69,630	128

These figures go to show that during the present period, these loans were granted rather on a liberal scale to be of substantial benefit to those that undertook to build better class of houses on sanitary principles in furtherance of the Departmental Improvement Schemes.

36. Out of the total amount of Rs.69,630/- lent as above, the repayment of Rs. 43,752/- fell due by the end of February 1916, against which Rs.34,506/- was actually recovered. The following percentages of collections to the

respective demands made out for each of the three periods of the Board, indicate that as a result of greater check exercised on the collection staff, there has been a decided improvement in this direction too during the period under review:-

Period.	Demand. Previous arrears.	Current demand.	Total.	Collection	Per centage of collection to demand for each period.
From 1904-05 to 1907-08	--	7,534	7,534	3,673	48.8
" 1908-09 to 1912-13	3,861	13,774	17,635	11,355	64.4
" 1913-14 to 1915-16 (up to end of February 16)	6,280	22,444	28,723	19,478	67.8
Total	"	43,752	"	34,506	"

City of Mysore Improvement Fund.

37. Sums aggregating Rs.37,76,508 including the realisations from sale of Trust properties, recoveries on account of loans and other miscellaneous items, were placed at the Disposal of Trust Board, up to end of February 1916 for carrying out the purposes of the improvement Regulation. Out of this sum, Rs.32,37,723/- were used on the various improvement works of the city, Rs.4,01,456/- spent on account of costs of establishments, Rs.69,630/- invested on loans for House-building purposes and

and Rs.58,547/- appropriated for miscellaneous ~~xx~~ items of expenses, and there was left a balance of Rs. Rs.9,153/- at the credit of the fund at end of February 1916. The accompanying statement No. VII~~I~~ furnishes a comparative view as to funds made available separately during the 3 periods of the Board, and how and what extent of the sams was utilized in each period. According to this statement, the actual outlay on improvement works proper, represents 84.4 per cent of the total amount made available during the first period 77.9 per cent during the second period ~~xxxxx~~ while the same works up to 87.1 per cent in the present period under review. This feature of improvement in the current period is the outcome of the efforts made not only for utilisin the grants of each year to its fullest possible extent, but also for appropri ating for works only, all that amount of difference between the costs of establishments as under the previous and existing scales.

Revision of the Trust Board establishment.

38. The appointment of the Engineer President -Chairman dispensed with the continuance of a separate Executive Engineer for the Trust Board.

Board. Proposals were submitted for distributing the hands of the late Executive Engineer's office among the offices of the Chairman and the Assistant Engineer, for increasing the pay of certain officials of the Chairman's office, and for changing the designation of surveyors and maistries into Sub-overseers of 2nd and 3rd classes respectively and for revising the scale of pay of all the Sub-overseers to bring it in a line with that obtaining in State Public Works Department. The average monthly cost of the Trust -- Board Establishment during the period under report amounted to Rs.1,995/- against the average cost of Rs.2,501/- during the period immediately preceeding it, and Rs.3,521/- during the first period.

Register of the Trust properties.

39. These important Registers showing the assets of the Board in the shape of its immoveable properties were in different stages of completion before 1912-13. During the period under review the same have been caused to be brought up-to-date, the entries of previous years being got verified.

Summary.

40 It will be seen from the

44

the foregoing that under the present ~~arrang~~ arrangement under which a whole-time -- officer is appointed as the President of the City Municipal Council and the -- Chairman of the Trust Board, Mysore, the following results have been achieved.-

I. Regarding the Municipal administration, (1) the work of revising the assessed taxes which was not effected since 1905 has been completed;

2. The Municipal Revenue under various heads has been increased, especially under Octori;

3. By writing off such of the arrears as were found irrecoverable after careful scrutiny, the collection work of the -- Department has been placed on a better basis;

4. Public works both original and repairs on a much larger scale than in previous years have been carried out,

5. A large out lay has been incurred for Primary Education and sympathies of private gentlemen in its cause enlisted appriciably,

6. To prevent the spread of Malaria in the City, an Anti Mosquito Gang has been organized and a large number of musquito breeding wells and pools been already -- closed,

7. Nuisance from stray cattle has been mitigated by providing for rewards to impounders and by employing special impounders

8. A comprehensive scheme for improving water supply by providing additional public fountains and submains has been submitted for sanction;

9. The lighting of the city has been improved by the installation of the -- electric lights in places where they did not exist,

10. To afford greater facilities to traders and the public, the Devaraj and other Municipal Markets are being extended and improved;

11. The efficiency of the Head office and the various departments of the Municipality has been improved by the introducing the Municipal Account Manual and giving effect to the rules of office Procedure issued by the efficiency audit Department,

12, Committees for Municipal and other activities have been formed on the lines laid down in Government Order No. 4144-Ml.99-14-2 dated the 23rd November 1914;

13 Rules under section 4 of the Public Conveyances Regulation, rules for Regulating the speed of Motor Vehicles, and Bye-laws for regulating the working of the Slaughter houses, for awarding rewards to informants in cases of smuggled goods, for regulating building and other structure, and by-laws under section 46 and 48 of Municipal Regulation and

and those relating to dangerous and offensive trades, have been framed and sanction of Government obtained thereto;

14. A hand book for Mysore City has been compiled and published; and

15. Arrangements were made for the Local Board and Municipal Conference to hold its first session in the Mysore City under the auspicies of the Municipal-- Council~~s~~.

(ii) On the side of the Trust Board

1. A decidedly larger quantity of work has been turned out in respect of both preparation and execution of the improvement schemes of the city.

2. The scope of these improvement schemes has been enlarged by including -- therein works adding to public convenience and attractions of the City.

3. The several items of works required for the further improvement of the City in the immediate future have been made out exhaustively after a careful study of its needs and conditions, and reported upon.

4. Estimates amounting to ~~Rs.~~ Rs.35,15,793/- have been prepared for works required to be carried out by both the Trust Board and the Municipal Council under the programme laid down by Government in 1914 with reference to the above report.

5. The work connected with the acqui

acquisition of the properties for the Board which during the previous regime devolved upon the Senior Vice-President of the Municipality is being attended to by the President - Chairman himself,

6. A large number of properties out the declared ones that remains unacquired from several years have been inspected and a Notification of withdrawl prepared for submission to Government in respect of such of them as the acquisitinn whereof are found unnecessary,

7. The question of over-crowding caused by the displaced population has thoroughly been investigated into, and a scheme of five lacs with suggestive measures for properly re-housing them placed before Government.

8. Underground pipe sewers to a length of about 26½ miles have been laid in different parts of the City and 2,537 House Connections given,

9. Proposals to construct more than one house connection according to the actual requirements of each house at the cost of the Trust Board and to make the house owners pay a reasonable Drainage Cess to the Municipality on that account have been got approved by Government,

Your remarks on page 25 of the Report

10. The Out-fall sewer works have been completed and the sewage farm works are in progress,

11. Rules to provide against un-

unlawful interference with the underground drainage works have been now sanctioned by Government;

12. The south-east portion of the City was specially treated in point of its aesthetical improvements so that it has assumed altogether a new picturesque appearance;

13 A new residential area has been created by acquiring the Mango Garden that belonged to the late Mr.Bhakhsi Basappaji Urs,

14. Ten model houses which command ready sales for the poor and middle ~~class~~ classes have been constructed,

15. A complete review of the several measures taken by the Trust Board to hand over and the reasons put forth by the Municipal Council to take over charge of the completed works has been placed before Government for final orders;

16. Loans have been more liberally granted to persons that have undertaken to build sanitary houses of better type in ~~furtherance~~ furtherance of the Departmental improvement schemes and with greater check exercised on the work of the collection staff a perceptiable improvement has been secured in the recovery of the loans,

17. Funds made available for improvement works have not only been utilized to the fullest possible extent but have also been more economically managed by appropriating all the amount set free from ~~establishment~~

49

establishment charges under the present reduced scale, to works only, and

18. The important Registers of the properties of the Trust Board which were incomplete from a very long time have been brought up-to-date.

President-Chairman.
